

CHARLESTON
SIGN MANUFACTURING

MADE IN MISSISSIPPI
DIVISION OF SIGN FAB, INC.

PAN & FLEX FACE

PAN FACES

Charleston Sign Manufacturing offers a wide range of sign panels in both aluminum and high impact plastic substrates. In addition to these, they also provide pan face configurations, which are designed to create a more substantial, three-dimensional image.

These pan face signs are vacuum-formed to a depth of approximately 2", giving them a striking appearance that will make your graphic message stand out.

They are an affordable option for both illuminated and non-illuminated signs. You can choose from

second surface vinyl, back sprayed embossed lettering, or first surface applications to customize your pan face sign.

These panels can be easily integrated into Charleston Sign Manufacturing's line of architectural signage extrusions, ensuring a professional finish.

USED FOR
Primary Signage

PAN FACE COMPONENTS

FLEX FACES

Charleston Sign Manufacturing also offers a complete line of flexible face panels, which are designed to help your graphics be more visible.

These panels are designed primarily for use with the Series 1200 framing system and are perfect for large commercial applications.

The tensioning systems and choice of fabric covers are thoughtfully designed to make these panels durable and visually appealing no matter the application.
