

The 750 Series is a primary sign system that's suitable for both illuminated or non-illuminated applications, with a 7 1/2" wide post and frame that gives a substantial appearance to any sign design. You can choose rectangular, radius, or full-round posts, cabinets with square or radius corners, and a skirt base option that gives a monolithic appearance.

LEDs provide uniform illumination. Graphics and copy can be routed out, digitally printed, or applied by conventional methods, with panels available in aluminum, polycarbonate, acrylic, or pan-faced.

The 750 Pylon System features a 7 1/2" wide Series 750 frame extrusion that provides a free-standing illuminated pylon sign, with the same graphics, finishes, and skirted base option as the 750 post and panel sign system. We provide custom mounting systems and designs to fit your architectural requirements.
